

The complaint that is attached explains most of the issues, although this is being sent to give information that expresses that I have been continuously getting drugged since I have began filing complaints initially. You can also contact various people in Louisiana, or Tennessee to determine facts. It shouldn't be difficult to begin to fact check things especially if you are in a government capacity.

You are a recipient of these pages because I felt that I had exhausted all other options in my attempts to contact various parts of the U.S. government. I am distributing this federally because it has happened across several states, and my intellectual property has been stolen and used in a federal capacity. I apologize if it might not seem clear why you are getting a copy sent over although I believe it is best to try as much as possible. This is a critical issue which is currently happening in my life on a daily basis completely bypassing my human and civil rights. It began in my childhood as a teenager, and now I am 31. The attached complaint will give a little more information than this e-mail directly. This was sent as an update, and a plea to ask for another portion of government to step up and prevent anyone in any industry from bypassing someones human, and civil rights. I have always been an American citizen, and am completely shocked to realize 1% of this. I am starting to wonder how many other people do not realize that the government is able to bypass their human and civil rights as they wish?

In my previous fax I had left out several critical circumstances of which I assumed I would deal with in private court. The situations have not stopped, and its still a part of my daily life since. I've been drugged countless times since I had first sent the complaint earlier this year. I've had 50+ rape incidents that are going to be reported as well. Some of these 'date rape drugging' scenarios even occurred after I began notifying government. This only leaves me to believe it was encouraged, and authorized by government. It doesn't seem like my situation was taken seriously. I decided to send an update stating that I am still being abused, drugged, and I'd like to formally notify anyone who is the recipient of this that there are going to be dozens of sexual assault charges being filed. The first goes back to before I was even an adult in New Orleans, and the last was within the last year in Florida. I am not exactly what the drugs are however I'm certain that the doctors are authorizing their use. Its definitely documented as the medications were released. I do not know why anyone in their right mind would allow doctors who have date rape as a 'medical option' to practice. I plan on working towards disbaring any lawyer who knew and allowed these types of actions.

My family had made very terrible choices regarding my life. The choices included the Louisiana government while living in New Orleans. Their extent goes beyond anything any citizen should accept, and expect in their lives. It has been more than a year since I've questioned my family yet they will not give me any information. I stated in this prior complaint that I plan on filing charges, so it could be a choice under their own constitutional rights. It'd be pretty funny if they are using the constitution in their own favor yet destroyed any ability for me to have rights in my own life. I am also adding that these doctors, etc surely have a reputation, at least now, to use rape as a 'medical procedure.' Its possible that some of the situations were a doctor working alone, although its happened in several of the areas I had previously reported in the complaint

that follows. United States alone consists of 4 states that will have these charges filed.

I have had some slight memory loss again, and I will definitely file new charges for every incident that has happened after I contacted senators, and other officials. I will also file for charges in the area of \$300mil/situation from the last few weeks realizing that I am losing memory of various things while I'm working, etc. This includes the fact that when you lose memory you are not forgetting a single detail. It means losing brain cells, and neurons that are connected thus literally dying by the hundreds of millions as clusters. I don't even know the scope of how damaging this is to my brain. Its far beyond whats legal, and yet its being authorized right now. It is affecting every aspect of my life, work, future, and livelihood. I've stated in every way possible that it is harming me physically, and mentally. These doctors obviously know its harming me. I'm going to move to disqualify their medical licenses, and any civil servants jobs that have authorized these torturous acts to continue. Nobody should have the ability to affect other peoples lives in such ways. I am not military, nor am I in prison. It is going to be detrimental for anyone who authorized it to go this far in my opinion, but thats just me looking at my rights as a human being and an American. I understand I will spend a good portion of the next decade and a half in court. It will be worth the trouble to ensure nobody ever authorizes this upon another persons life in USA again.

I will begin disclosing information to the particular counties involved about each incident regarding sexual assault within their areas. The chain of command that allowed this to proceed should probably be reviewed immediately considering the large legal liabilities that they seem to have brought upon themselves. It will be somewhere in the range of 10,000 assault charges over 18 years. It will include anything that causes bodily harm, or negative impact short and long term. Hundreds of these may qualify for aggravated assault as well. It will depend upon the location of the incident, and the laws within those regions. I was drugged with psychological drugs so I will be pushing to determine if manipulation was used to put me into particular positions in regions where assumption of more 'relaxed' laws which would allow least punishment has taken place. The movement, and considering of these these laws will come into question because of the date rape, etc drugs that were used. It could be considered that all actions after these drugging incidents may have been tainted due to the medications forced into my body without my consent, or knowledge.

I will have to file charges and expect a grand jury just to paint the picture to quantify what constitutes a single count of assault. It is then the question of how many milligrams of medications, and mixtures were given. It includes how life has changed during 'treatment,' lasting affects on my psyche after each incident, and disregard of my civil rights. I've definitely came up with this number by this has been practically every day for years. I plan on finding every case these insurance companies, and doctors have dealt with to attempt to find other victims. It will then be my purpose of blocking any other American citizen from ever dealing with such disaster. The insurers shouldn't even be allowed to give insurance in such cases. Anyone who didn't say "no," quit, report to senior officials, or otherwise is practically exposed. Any lawyer who assumed their role of me being their plaintiff should be disbarred immediately for not ensuring the rights of their clients. Numerous other moral, and otherwise important obligations exist

to ensure such a situation never exists. The medical system was not the only required industry to have failed to allow this to happen for so long. The governments involvement, and commitments during these periods go against our human, and civil rights in every way to have exceeded in stupidity to this degree.

You should really ensure this isn't possible to happen to anybody, or any other American in this country. I refuse to sit by and let other people dictate, and harm other peoples lives regardless of who feels they have authority. If you won't do anything about it, or if you do.. I plan on starting a think tank across all 50 states to work on topics just such as how this was ever even allowed to happen.

Intellectual property theft within my life seems to have happened on a scale where it became usual, known, and almost routine. The various techniques used for this each constitute several crimes within themselves under U.S.A. law. Various other crimes will be amended to the initial charges after discovery due to government oversight, involvement, or authorization.

I'm including the original complaint as well for reference, and for reading if you didn't have a copy before.

Human Rights Council

Complaint Procedure Form

- You are kindly requested to submit your complaint in writing in one of the six official UN languages (Arabic, Chinese, English, French, Russian and Spanish) and to use these languages in any future correspondence;
- Anonymous complaints are not admissible;
- It is recommended that your complaint does not exceed eight pages, excluding enclosures.
- You are kindly requested not to use abusive or insulting language.

I. Information concerning the author (s) of the communication or the alleged victim (s) if other than the author

Individual ☒ Group of individuals NGO Other

Last name: Guidry

First name(s): Michael

Nationality: United States Citizen

Address for correspondence on this complaint: None at the moment.. I am traveling and do not feel comfortable living in a specific place in USA

Tel and fax: (please indicate country and area code) +1-650-491-4016

E-mail: mike.guidry@gmail.com (but would rather discuss in person on video)

Website:

Submitting the complaint:

On the author's own behalf: ☒

On behalf of other persons: (Please specify:)

II. Information on the State concerned

Name of the State concerned and, as applicable, name of public authorities responsible for the alleged violation(s): United States Federal Government, Louisiana State Government, Jefferson Parish City Government (in Louisiana, USA), D.E.A. of New Orleans, Riverside County Government, Greenville County Government (Greenville, TN, USA), Harris County Government (Houston, TX), Sarasota County Government (Florida, USA), FBI of New Orleans, United States Postal Inspection of Pittsburgh, Jefferson Parish Government

It has also happened abroad: Thailand, Germany, United Arab Emirates, United Kingdom, and Bahamas. I am unsure of whether it was purely a doctor working with USA, or what sort of circumstances were negotiated.

III. Facts of the complaint and nature of the alleged violation(s)

The complaint procedure addresses consistent patterns of gross and reliably attested violations of all human rights and all fundamental freedoms occurring in any part of the world and under any circumstances.

Please detail, in chronological order, the facts and circumstances of the alleged violations including dates, places and alleged perpetrators and how you consider that the facts and circumstances described violate your rights or that of the concerned person(s).

I'm leaving out specific identities of people whom may be directly involved, or indirectly working for the U.S. government. I will deliver the information to the U.S. embassy so it can be handled with care. I am however leaving in any other names where I am near positive that it doesn't relate to government agents. The order may not seem chronological but that is only because of the nature of me not remembering for such a period of time. I am attempting to express it in the best way possible which entails the events as I have known them. I have also wrote this as a first draft in 20 minutes, and then went through it again very fast as well. Please excuse grammar, etc.

It is tough to detail in chronological order due to the nature of the incidents. I have been drugged an uncountable number of times which caused panic attacks, and two of some other different agent. In New Orleans, the local government on Tuesday, February 28th had through an agent named 'Identity A' of whom I met through 'Identity B' had given me a drink of water which contained a large amount of some toxic chemical. It had caused me into a panic state while being followed by agents of the local government in Louisiana. I called my family, and reported every license plate, and even researched some on locateplus.com. This is a website that I had been familiar with due to helping a local bounty hunter track citizens who skipped court sessions. The information researched in some form may be kept with my parents. I was told it doesn't exist, although I have also been lied to by my family numerous occasions. Feel free to contact them through U.N. officials. I suspect I'll end up filing lawsuits in the near future even against my family due to a lot of the circumstances. I'm assuming it was created to attempt to 'scare' me. This actually only just gave me 10 years of PTSD. It was not until recently that I could even recall the incident of being given water containing a drug unknowingly.

At some point in middle school some kids, Cody/Willy Owens (brothers) of whom were my sister's best friend (Colleen Owens), had gave me something in a bottle of water to drink, and then told me to leave and do not come back to their house. I briefly remember feeling a mode of flight of flight, and then I do not remember anything else thereafter. For some reason out of this world the Louisiana government thought that continuously drugging me for the next 10 years would help me remember this occasion. I didn't remember a thing about it

until recently after I had been drugged again by a 'second' agent which didn't cause a fight or flight feeling. However, being drugged randomly for 20 years has been a nightmare. There was also a rape/molestation (however you look at it) scenario involved with another 'childhood friend' named Joshua Nida. I didn't remember this either until recently, however somebodies bright idea was to have another girl whenever I was 14-15 wake me up to oral sex. This is around the time whenever I began getting drugged randomly.

My first time feeling a dose of intentional drugging was the first time I had a particular alcoholic daiquiri with my sister Jean, at her friend Kerry Plaisanes. My reaction was to run around the apartment outside, and then was puking for several hours. I am sure my sister can give you full accountable details of this situation. I was even questioned later to determine if I remembered it or not. I believe I was 13. This must have been just a couple of years after the incident with Cody/Willy Owens.

I began developing software hacking utilities as child spending most of my time out of school online. I first came into contact with the F.B.I. of New Orleans after creating a hacking tool called 'Trinoo' which was the first DDoS (Distributed Denial Of Service).. The 'handler's name was Sydney Reed. This FBI agent gives me no reason to believe he is or will be undercover. It was shortly after this whenever I met 'Identity C' in High School. This 'friendship' contains several occasions relating to the complaint being filed.

The first time I remember being drugged with large doses was at the Daiquiri Shop, located at 2015 Woodmere Blvd, Harvey, LA 70058, United States, however it was a different name then. The drugging took place with possible witnesses or persons involved being: Identity C, and Identity D. This is just a type of drink therefore it is a regular bar. While I was being drugged I was told that whenever I accidentally called 'Identity D' one night (because I remember phone numbers just by hearing them and was attempting to call another 'Identity D', and she just happened to pop up in my head) that her boyfriend beat her up, killed her, and was put in jail for life. I barely remember the incident after that however she ended up coming out of the back of the daiquiri shop shortly thereafter. The statements were made pretty much simultaneously with the drug being ingested probably through a daiquiri, or mixed drink at the time. Everyone said she was OK, as if it was a joke. I was however under the effects of this drug therefore in fight or flight mode. I remember becoming extremely tired shortly thereafter and cannot remember anything else.

I ended up having panic attacks that were getting worse and worse throughout my childhood teenage years. I had them every single day in school, and had to quit in the 9th grade. In hindsight, all of these years of panic attacks were forced from these incidents. I honestly believe I'd have never started having them otherwise. I am astonished that people are ridiculous enough to drug me attempting to cause me to remember being drugged, or other memories to begin with. It essentially ruined my childhood, and 12 years of my adult life.

The next time that I am pretty much positive I was drugged was eating food at Applebee's on S Clearview Pkwy, near the intersection of Village E St. I was with Michel O'roarke, and her

husband of whom passed away Casey O’Roarke. There have been countless times whenever I would just have panic attacks and now I’m realizing they were all related to these drug incidents.

I moved to California and worked for a company called Price Communications in 2004. I was told by someone right before moving to California that the FBI is doing investigations and thought that moving to another city is one of the most stressful things that someone can endure during their life. I’m assuming this is why this situation was brought into my life. I understand that I made this choice of my own ‘free will.’ However, if you take a minor and control enough variables then you pretty much take away their free will.

It was a pornography company, and I was dating a girl named Jennifer Bodker that moved there with me. There have been several incidents within California during this time period where I believe I was given hormones without my consent, or knowledge. I do not know exact dates of occasions here. I had also remembered one day having a very horrible panic attack although in general nothing like the ones noted above. I cannot or don’t understand the specific at the lower dosages, since it became so frequent. I’m assuming these ‘smart doctors’ believed giving me hormones while also having me around pornography would somehow force me to remember the situations that happened whenever I was younger. These doctors need to be stripped of their licenses. I was 17 years old whenever this took place, although I do not know whether California law means I was a minor, or not.

I moved back to New Orleans in January 1, 2005 because Jennifer missed her family and wanted to move back to New Orleans. It could be just because nothing had been working for the ridiculous attempt in California. I was then introduced to ‘Identity A’ through ‘Identity B’ to help fix his computer. We were friends for about a year before the situation happened on Mardi Gras day whenever I was given the highest dose of this drug that I have known in my life, except for the initial one from the kids whenever I was a lot younger before all of this began. This is the time I had my family pick me up from the hospital and I went to Tennessee with them.

The F.B.I. essentially setup a scenario where they entrapped me and began introducing particular aspects into my life. I was supposed to have been ‘arrested’ for ‘using computers with intent to fraud’ and the arrest wasn’t until 2 years later (I was 15 years old whenever they took all of my computers, and data), and put me on probation. It’s a pretty funny situation now considering my lawyer claims that he never even handled the case. It’s pure deniability now. I believe this was a fabricated situation, and the entire case was a joke. I was having panic attacks due to being drugged by the government at this time. I had taken an anti-anxiety medication while on probation for this ‘crime’ I was entrapped into. I was put into juvenile detention for 11 days. I firmly would place without a doubt a huge bet that this in the end could be considered false imprisonment due to the entrapment of the entire ‘fraud case.’ I believe that the software on my computer has also been used such as intellectual

property theft during this time. The last I had to deal with this 'case' was Federal Court with a Grand Jury on my 18th birthday. My lawyer denies that this ever existed. It was in Pittsburgh Pennsylvania with the Postal Inspection Services. I was born June 4th, 1985. I'm speculating that crossing from a minor to an adult required this case to continue these obnoxious habits of law enforcement, and drugging me.

I would love to give details of the case but my lawyer said it didn't exist, and that I needed to check with the Secretary of State's 'Corporate Division.' The lawyer's name is John C. Bono. It's interesting to have your own lawyer claim it doesn't exist, and that he has never handled a fraud case. However, the corrupt Louisiana government portrayed it as such.

I had also worked at the government in Louisiana for the city for a brief few months. I had helped them solve a large computer virus issue. I was not an unknown person there, however I did not realize or remember any of the other incidents from whenever I was a child while I had worked there, or even until recently.

I had moved to Tennessee where my family had lived after the Mardi Gras incident. My mom briefly mentioned something along the lines of would I like to try an experimental medication, and I said yes. It was purely in the middle of a general conversation. I would have never expected to be drugged unknowingly. This in no way is me giving authorization in my opinion to drug me in any way shape or form by anyone. It was not anything official, nor did it even discuss a particular medication or details. I was given something around a various date in early 2007. I essentially had to relearn vocabulary after this drug was induced. It happened around my family though. Michael Gerald Guidry, Teresa Marie Guidry, Jean Guidry, and Michel O'rourke. I am unsure exactly when or how because the drug affected me on such a major scale. I wasn't told I was being given it, and there was all around denial throughout the entire time. I started focusing on writing software, or getting better at it.

I had went to Houston, TX where my sisters husband was getting leukemia treatment around this same time. I was given hormones without my consent, and I had no idea what was going on. I felt like I had to urinate constantly. I was with my sister Jean Guidry, and I began feeling it in the morning after drinking Starbucks for the first time with her. It lasted for about a month, and was a miserable feeling. It even lasted until I had moved for 1 month to Mission Beach, in San Diego, CA. I was in a PTSD state while living here and ended up going to my families house in Moreno Valley. Danny and Margaret Reed. My aunt Margaret had made some comment, 'You don't want them to lose their funding, do you?' Which directly relates to some obnoxious way of people attempting to get me to remember things by the most ridiculous methods. I had moved back to New Orleans after this, and was working with a guy named 'Identity E.' This was essentially a computer shop, and pretty much not so interesting except due to a later scenario.

I moved outside of the country to work with a group. I had been given this panic inducing drug while in the Nassau, Bahamas only one time that I can remember. The dates are very

vague and we can revisit this at a later date if necessary. I'd also like to keep the names of this group out of this document because a particular night it was stated the U.S. government was involved with the software that was being developed. I didn't believe it at the time, and ignored the statement. I now believe that to be absolutely accurate. I was writing very particular sets of computer programs which I don't think relates to the original argument. I also do not want to put any possible agents in harms way. The fact is that the government was still involved even outside of America whenever the incidents continued. I had moved back to USA after 3 months. I'm assuming the high stress (long hours, etc) paired with the induced drug was something some doctor concocted believing it was trigger a memory recall of the first time being drugged. Yeah, right. It wasn't for another decade that it actually worked. I would randomly get drugged at any point in time more or less.

I moved to Dubai, UAE and lived there off and on for the several years. i was working with the same group from the Bahamas, although introduced to another partner, 'Identity F.' I remember one moment where I was given this drug while drinking coffee in Sharjah, UAE which is the next emirate to Dubai. I had went to the hospital and just waited outside and it finally went away. It was definitely a large dose, but not as large as the one I had at the daiquiri shop that day. Each time induced immediate fight or flight mode. At this point I still didn't remember, or even place these events together so I thought it was just from high stress work (18 hour days), paired with coffee.

In 2008 I had went to Thailand through a group I had met via 'Identity E,' and we met with their top 3 internet providers. I had spent 2 weeks there working, and 2 weeks in the southern area of Thailand. On the last day I was there in Thailand I had been drugged at a restaurant in Laot Prao of the same associates of whom had introduced our group to the government, and the internet providers there. I went to the hospital, and ended up leaving the next day. The doctor said that it was a gastritis issue, and since at this point I didn't understand the scenario.. I had no reason to suspect differently. It wasn't until later that I realize this was just another incident in the long list.

I met a group of German guys of who ended up knowing the group I was associated with in Sharjah, UAE. They invited me to Rock am Ring in Germany. At the last day of this festival in 2009, at the 'cockpit' bar I was given something in my water. I knew I was being drugged, and how for the first time. It was a large dose, and it only took a single sip. It happened on the last Sunday of the festival. The way the situation was setup was the night before I was told the young (16 year old) girl was an underage prostitute for the group, and I refused to be involved so I did not bring her the 'VIP' pass I was supposed to. Inside of this VIP tent I had some guy step on my shoes and say that I should not leave alone, which I was assuming he meant to make up for the 'loss of money' from me not bringing the girl the pass. I ended up leaving alone. He was stepping on my feet, and then also attempting to offer me a beer. Funny enough, earlier that day at the festival I was given a beer and it was giving causing a

similar (lower dose) feeling. I couldn't connect the dots until recently. I ended up leaving, and the next night was whenever it happened in the 'Cockpit' bar. This was in Nurnberg, Germany.

I had a taxi driver bring me to the hospital and I sat there for 4 hours and started feeling better. I didn't want to check myself in unless it was going to get worse. I took an extra sip of this water while staring at the main guy 'Identity F' and his comment was, "You need to go to the desert and think for a few days." I'm assuming he was telling me to stop drinking the water. I can however find out this information at a later date, and could even find his house if I were to follow a map from Cologne on Google if necessary. I had driven to his house at one period in Germany, so I'm sure I could figure out the exact location.

Sometime in 2012 during a wedding event that I was invited to by the group in the UAE I had an incident at a bar called 'Rock Bottom' bar in Dubai. I was given a large dose of this drug which was probably the second largest in comparison to Mardi Gras. I do not remember who I was with, and can barely remember their faces. I'm assuming these doctors have never taken this drug themselves. That's for sure.

I went to Ibiza in June 2012 just a few days after I spent my birthday in London. I met a group of British guys at Pascha bar, and was given a drink which I believe had been laced as well. I was introduced to my girlfriend, Anna Tarnopolsky, shortly thereafter (20minutes). This relationship was purely stressful in its entire form. I was living in Dubai, and she insisted on me moving back to America. I might add that during this time I had created absolute ways to block all current hacking technologies. I'm assuming USA didn't want me overseas anymore. This is speculation however it sits right in with everything else since. I lived in Philadelphia with her for several months, and we had many breakups. I had moved to San Francisco, and she moved there a week later. In San Francisco, I had been drugged at least 8 times that year. It started getting extremely more frequent. I even went to the hospital one of the times after it was given to me at someone named 'Identity G's house. This guy was an Uber driver that I had met, and hung out with a few times. The hospital bill was \$5000+ and I still refuse to pay it now because I expect the US government to pickup that bill amongst others. I had also met several other 'friends' there of whom invited me out to an event of which I was drugged at and was in a complete paranoid state. One of these guys was a US soldier so I am attempting to keep any names out of this that may harm anyone of security clearance, etc. I cannot blame the individuals for doing their 'job.' However, I believe it fully violates my civil and human rights. I was at a concert called outside lands, with Anna Tarnopolsky, and 'Identity H.' I was given a beer (of which they had went and got for me since I was watching Metallica) and it must have had hormones in it. I felt a weird 'attraction' not sexually but physically towards anyone. It didn't feel like a normal attraction and was very strange. This lasted for several weeks, and was one of the worse feelings to have. I'd say that this was worse than the several hour panic incidents. I probably wouldn't

have even stayed in a relationship with Anna if I had not been drugged so many times. There is another portion of this relationship that requires attention of which will require a separate court case.

The intellectual property was discussed with a proclaimed government agent 'Identity H' with direct reasoning to offer the solution to government, not to distribute or discuss with anyone else. There are now two multiple billion dollar companies relating to these technologies. Both are for profit, and for public. One is being used by the USA government, which is one of the reasons I am afraid of staying in the USA, and have no recourse inside of America. The other is used by ex-MI5/MI6 agents in the UK. You can contact their diplomats to find out more information I am sure.

I moved back to Miami in 2014, and at this point in time I had only remembered the single Germany incident. In 2015 I was in London during the summer for a convention that someone suggested I go to. It was a security conference, and I had met another person involved in an 'entrapment' situation related around 'hacking tools.' On this night, I was drugged and then whenever I went back to my friends house they even created a situation trying to 'mimic' the original situation from New Orleans's Mardi Gras as much as possible. I cannot blame the UK government for trying to help. The dose wasn't that strong, and I don't think any amount of dose could have done to me what happened on Mardi Gras. The UK government can probably attest to information, and discuss why, and how ridiculous America is for doing this for 20 years. Anyone who is human would probably have an issue knowing that I was drugged continuously for 20 years with direct relations to the US government.

I began working in Sarasota, FL with a pretty stressful job, and believe I've had hormones given to me several times throughout this year. I was drugged at a particular house of someone with a military background, therefore I'd rather not share the name at the moment.

I realized my intellectual property was stolen through a third party who named the companies to me directly. This was the person who invited me to that security conference in London, where that incident happened. I was in Fort Lauderdale, and was given a different type of drug. It was the second time I had experienced these feelings, because the first was in Greeneville, TN around my family shortly after my mom questioned me about 'Experimental Medication.' This time however I didn't have to relearn my ABCs, or vocabulary. It actually helped, and allowed me to remember all of these incidents, and understand what has been happening to me in my life. Maybe the dosage this time was different.. I have no clue. I have had nothing but deniability. My sister Jean had first said that this was very weird, and not normal. She denies anything now as if she is scared. The only other thing I had read via e-mail is that people have only done things to try to help. Civil and human rights shouldn't be disqualified because someone assumes they are 'helping' by making things worse for two complete decades.

What do I want?

I want to ensure that no government, or state in America ever has the ability to make these decisions. The decision that caused me to literally lose 20 years of my life due to stress, etc. Random druggings, panic attacks, etc for 20 years is not fun. I want control of my intellectual property. I want safety and security in preferably the UK. I want any doctor, lawyer, state department, or judge to be reviewed that had any relation to my incidents. I do not want any of these drugs to ever be admitted without knowing knowledge of it happening. I would have been perfectly fine if someone sat me down and discussed what had happened to me rather than having the incomprehensible idea to drug me. It would be much easier to discuss the persons and have someone think about the situation rather than to take this 20 year route which destroyed a huge portion of my life, and family. I asked my family for information and they declined, therefore I'll never speak to them again.

Intellectual property wise: I am not going to state the company names, or persons involved because I do not want to harm their reputations. I know it is illegal to even invest in something that you know for sure has been stolen without consent. I had met one of the owners of one of the companies and told him directly I would not discuss it because I was waiting on a patent. The funny thing is that they had already filed. In the end, I could get their patent disqualified because they filed before the laws in America had changed to the 'first to file' system. I'll see how that aspect plays out in the future. I'm worried much more about my safety, and not being drugged again than the technology itself.. however that will be second.

IV. Exhaustion of domestic remedies

1- Steps taken by or on behalf of the alleged victim(s) to exhaust domestic remedies– please provide details on the procedures which have been pursued, including recourse to the courts and other public authorities as well as national human rights institutions*, the claims made, at which times, and what the outcome was:

The FBI of United States and other government agencies are using my stolen intellectual property to secure their networks. This creates a conflict of interest inside of America. I attempted to contact the attorney general of Florida. I had no response. I attempted to contact the Secretary of Defense, and the message turned into “null”

* National human rights institutions, established and operating under the Principles Relating to the Status of National Institutions (the Paris Principles), in particular in regard to quasi-judicial competence, may serve as effective means of addressing individual human rights violations.

literally within 24 hours. A lawyer in Florida declined to push forward, and I realized that with the deniability that it would go nowhere. I left messages on the White Houses website, and had on response whatsoever. I even attempted to contact the British governments MI-5/MI-6 of UK. The reasoning is because it had happened inside of the UK, and a company within their borders online is using technology that I firmly believe relates to my intellectual property. This company's parent company is also implicated by chat logs through someone claiming to be an agent of the U.S. government. I'm assuming that he leaked the technology to them directly. The website of the corporation claims ex-agents of their security services are running the company to offer non government civil corporations security.

2- If domestic remedies have not been exhausted on grounds that their application would be ineffective or unreasonably prolonged, please explain the reasons in detail:

I am afraid due to the nature of conflict of interest within the United States government involving the intellectual property theft during these incidents that I will not have ability to exhaust, or even have close to a regular legal scenario in the USA court system. I also fear for my safety whenever I am inside of the country. I do not know when or where another incident may occur.

V. Submission of communication to other human rights bodies

1- Have you already submitted the same matter to a special procedure, a treaty body or other United Nations or similar regional complaint procedures in the field of human rights?

No. I will drop off a copy to the US embassy, and notify them of identities that I am not exposing to the U.N.

2- If so, detail which procedure has been, or is being pursued, which claims have been made, at which times, and the current status of the complaint before this body:

.....

VI. Request for confidentiality

In case the communication complies with the admissibility criteria set forth in Council resolution 5/1, kindly note that it will be transmitted to the State concerned so as to obtain the views of the latter on the allegations of violations.

Please state whether you would like your identity or any specific information contained in the complaint to be kept confidential.

Request for confidentiality (*Please tick as appropriate*): ☒ Yes ☐ No

Please indicate which information you would like to be kept confidential

I'd like my identity to be kept confidential in the future so I can move on with my life. I understand the committee will have to discuss with the U.S. directly. Just do whatever you can do under the circumstances.

Date: Feb 26, 2016

Signature:

N.B. The blanks under the various sections of this form indicate where your responses are required. You should take as much space as you need to set out your responses. Your complaint should not exceed eight pages.

VII. Checklist of supporting documents

Please provide copies (not original) of supporting documents (kindly note that these documents will not be returned) in one of the six UN official languages.

- Decisions of domestic courts and authorities on the claim made (a copy of the relevant national legislation is also helpful):
- Complaints sent to any other procedure mentioned in section V (and any decisions taken under that procedure):
- Any other evidence or supporting documents deemed necessary:
- I have been unable to find any information of my 'arrest,' or 'grand jury' federal trial. My lawyer even claims he wasn't my attorney for any such case.

Contact information:

Michael Guidry (504-858-4299/Father)

Terresa Guidry (423-639-5019/Mother)

Address: 6242 W Andrew Johnson Hwy, Greeneville, TN 37659

Michel O'Roarke (423-278-8808/Sister)

Jean Guidry (423-483-6546/Sister)

Address: 605 Ohio Ave, Erwin, TN 37650

Anthony Sciacca (504-388-1154/Cousin)

Address: 3904 Grilletta Ct., Marrero, LA 70072

Tony Sciacca (504-228-0939/Uncle, Anthony's father.. spent some time at his house after being drugged.. can vouch for how it affected me)

xxx Lakelynn Dr, Harvey, LA 700xx

Danny Reed (951-316-2088/Uncle, Spent some more time at Danny/Margarets.. they can also vouch for how i was affected, and are also the family members who stated that I wouldn't want whomever to lose their funding...)

Margaret Reed(951-313-9306/Aunt, Wife of Danny Reed)

Debbie Reed(504-289-5550/Aunt, from New Orleans and probably has a lot of information as I had spent some time here as well in-between/during effects of being drugged)

The rest of the contact information can/will be directly delivered to US officials.
